

**Pupil Conference**  
**Friday 14 July 2023 in Elizabeth II Court, Ashburton Hall, Winchester.**

# CLIMATE UNITY PROJECT

One world  
for us all

## Artivism:

This year we invited schools to create artwork responding to Climate Crisis conversations to provide a digital exhibition. This is the various artwork created using drawing, painting, collage, textiles, mixed media and photography.

We have included previous artwork from The Climate Forest project 2021 and The Climate unity project 2022.

**Our Lady & St Joseph  
Catholic Voluntary  
Aided Primary School  
All year groups**

Local parishioners collected the bottle  
tops.

Reception recorded 'Commotion in the Ocean' verses on QR  
codes to accompany each sea creature

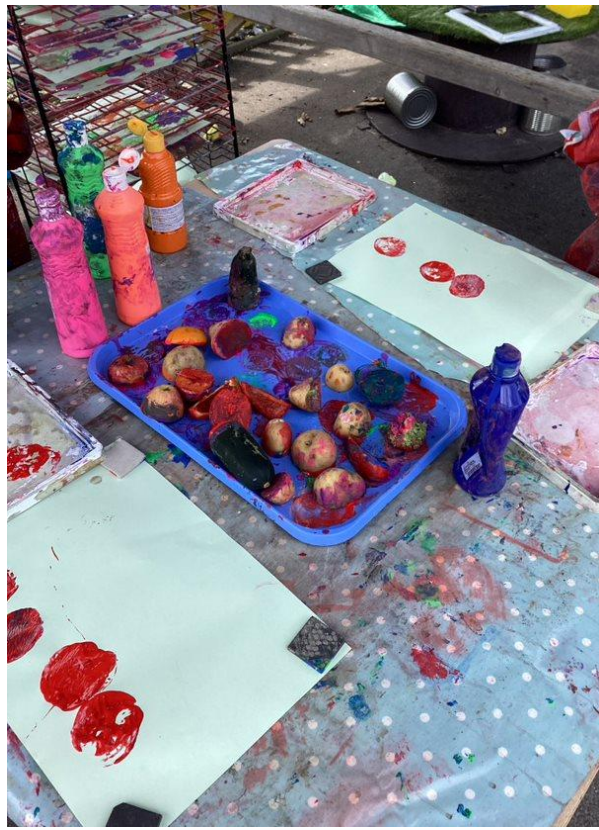

Created by Year 6 at Our Lady & St Joseph as part of an upcycling project in DT

LQ. Can I persuade people to think a certain way?

Purpose: To Persuade  
Form: Persuasive Text  
Audience: Anyone

*Do you like bees? Do you argue that bees are deadly because of their sting? Do you think that bees are worthless pests? If yes you are probably 100% wrong (depends if you hate bees or not). Bees will also only attack if provoked so **DON'T GET CLOSE TO ONE** or just use bee spray or do both, use bee spray from far!*

*Many people against bees claim that bees kill a lot due to allergic reactions and other causes; contrast to this, it is not at all factual. Despite these accusations, studies show that there are more workplace related deaths than the amount of times bees killed humans (5!). Furthermore, bees will only sting you if you provoke them so all you have to do is not disturb them. People kill some bees and nature just to build more buildings, some people die due to heavy machinery and they blame it on the bees!*

*A source from the University of Cambridge stated that like many other animals these furry creatures only attack and sting if provoked by a bystander. This information was backed up by Ron Roche who quoted "Once I was playing football in my back garden when a female bee with a stinger flew towards me and I prayed it wouldn't sting me and it didn't." On the other hand the researchers at Oxford University states that africanised "killer" bees will sting no matter what. In contrary, the odds of a killer bee going to your exact country, exact town and exact back garden is 1/10000000000.*

*Is hayfever bothering you? Do you want to reduce your annoying hayfever? Do you want to reduce your hayfever while eating yummy honey? If it's all yes, you need to read this paragraph. Many people have an allergy to bees as because of them hayfever occurs more often but did you know that if you eat honey from your local hive your hayfever will reduce significantly. A boy called Nathan stated that "I used to have hayfever and used to hate it but then one day my friend Tom who is a bee keeper gave me some honey from my local hive and hayfever didn't come to me for 1 year, 2 months, 3 weeks and 5 days."*

*In summary we should keep our fuzzy friends...*

Alderwood Secondary School  
Year 7

## Alderwood Secondary school

- Our reflective students have worked hard to create these personal and profound images about the Climate. They have thought carefully about how our urban environments can be greatly improved and rebuilt to play a leading role in rewilding and repairing in the years to come.
- They have shown great innovation and resilience in creating these highly detailed and fascinating visions of the future

'We are very pleased about the quality of the artwork, and I must say even just installing it made everyone interested and smile. The climate change messages told through the work produced by children really do have tremendous impact. I was pleased to have witnessed several members of staff chatting about climate change and what it means regarding their lifestyle, their conversations most certainly prompted by the exhibit.'

What is it to be a good steward of the earth?.....

‘being an architect for a better world.’

‘it encompasses all the things we do in our community and the world.’

‘helping everyone around you, looking after them and being a better person.’

‘basically, caring for everyone and everything.’

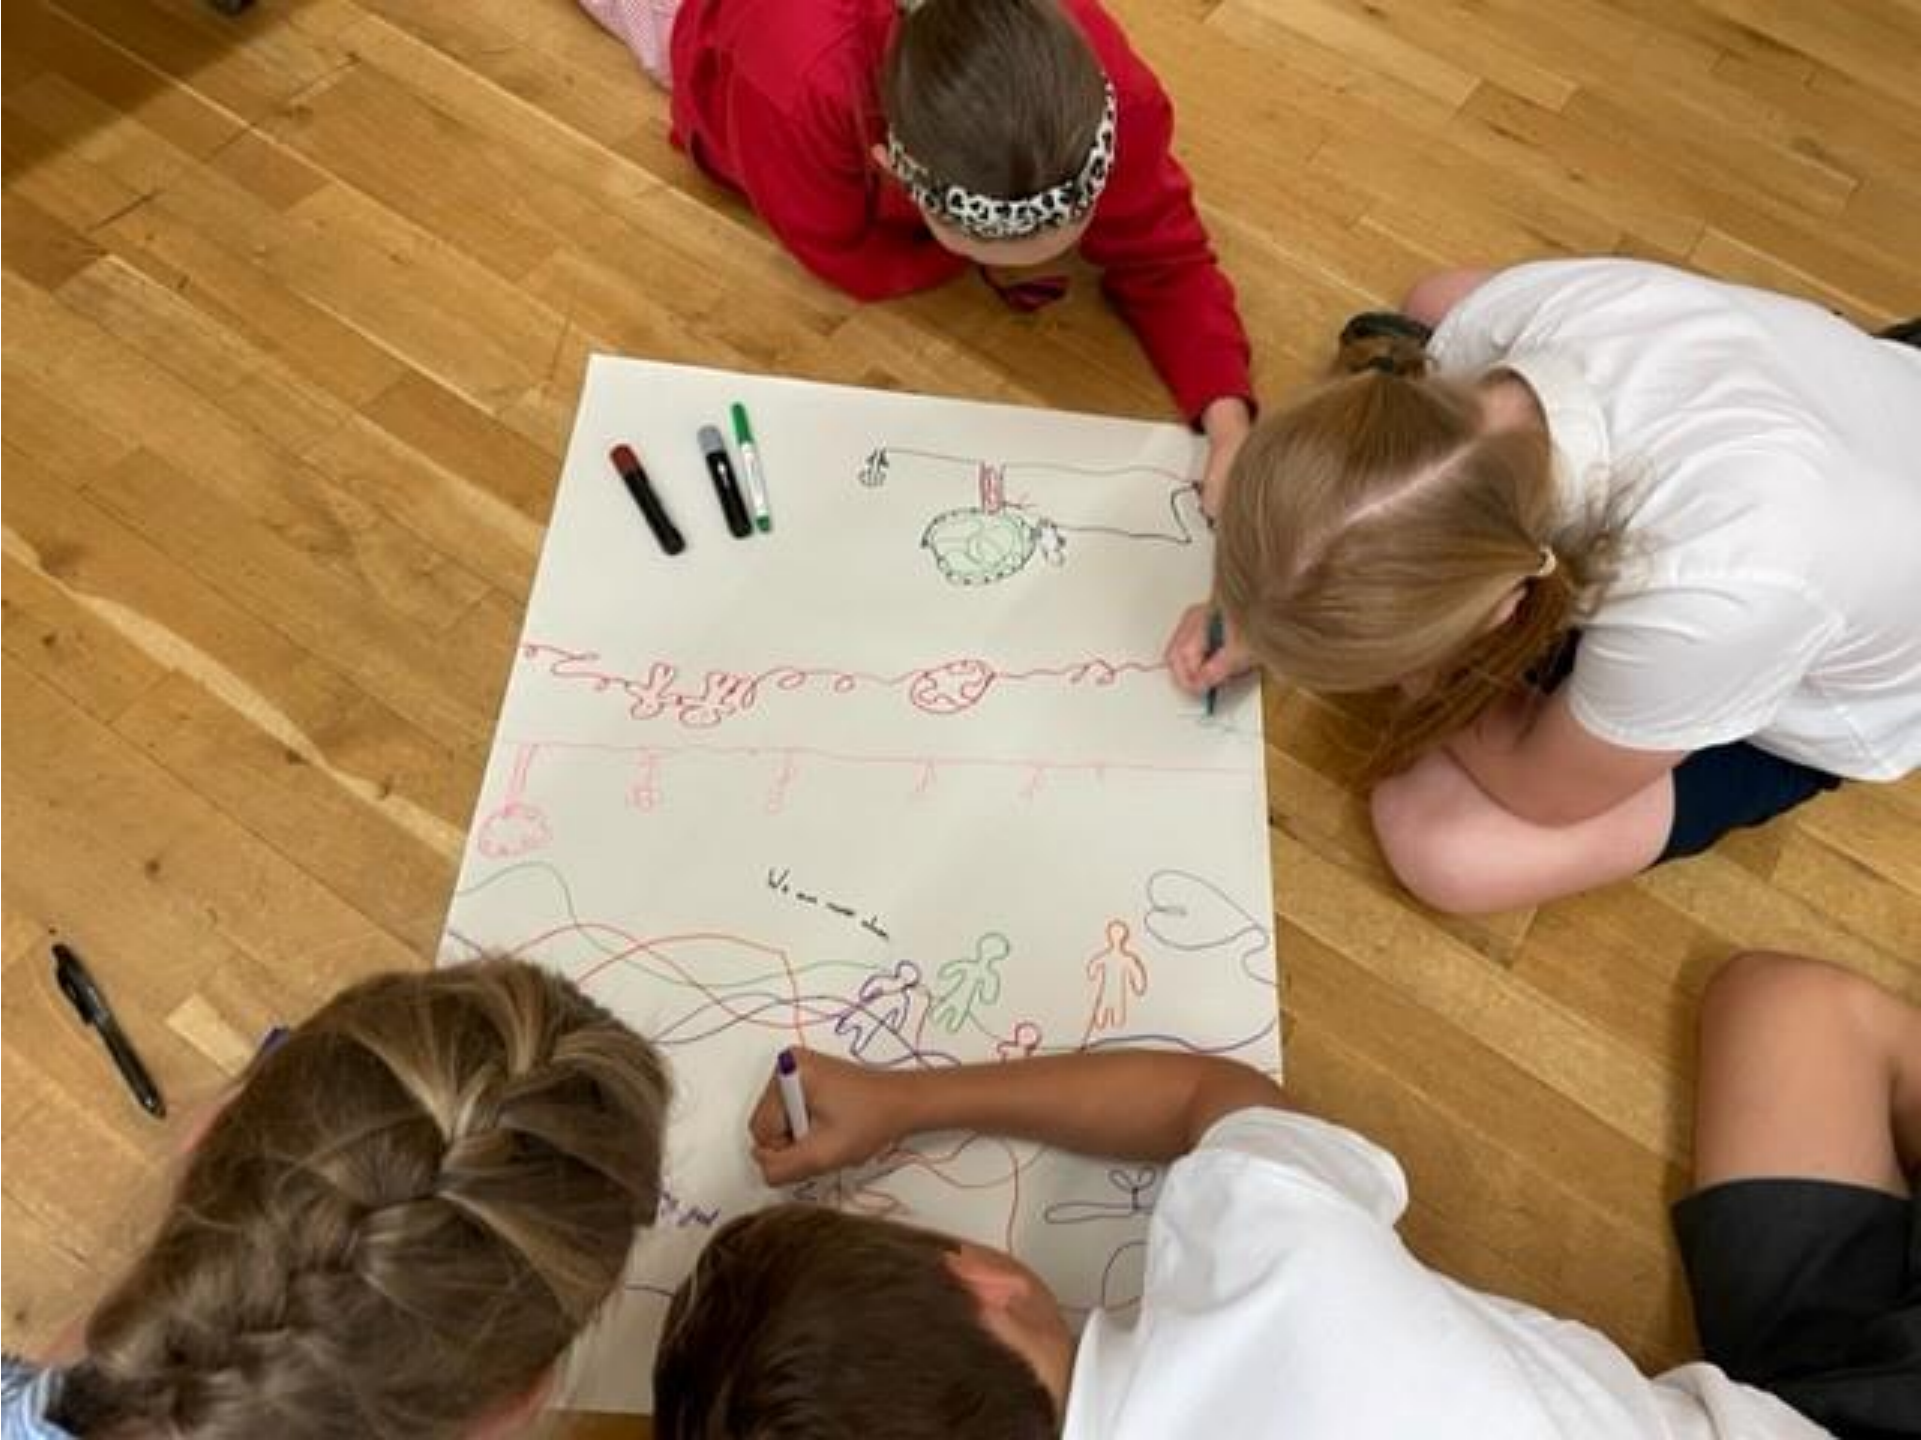

**Thank you for taking part.  
Please join us again next year.**
